

QMC Starter Kit

Make your first steps with the new VITA 93 - QMC mezzanine concept. The QMC Starter Kit is the perfect solution for gaining first experiences, showcasing, evaluating, and prototyping the true potential. The Starter Kit will include the following products:

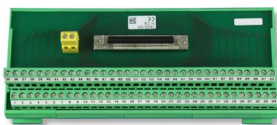

Quad UART QMC

- Single size QMC Module
- Multiprotocol transceiver offering RS232/RS422/RS485
- Operating temperature -40 °C to +85 °C
- Air-Cooled

Dual QMC Carrier

- Low-Profile PCIe Card
- 2 QMC Slots
- VHD68 Front I/O Connector
- Operating temperature -40 °C to +85 °C

Cable Kit

- 68 pin terminal block
- 1.8 m cable with VHD68 SCSI-V male and HD68 SCSI-3 male type connector

Device Driver

A Device Driver for Linux will be included to allow applications simple access to the UART QMC module. All functions are well documented in the User Manual and come along with example code.
